

# Just a minute!

And remember...

# NO

- Hesitation
- Repetition
- Deviation

How much do you REALLY know about it?

**LO:** Explain how traditional gender roles can make women more vulnerable to climate change.

**Success criteria**

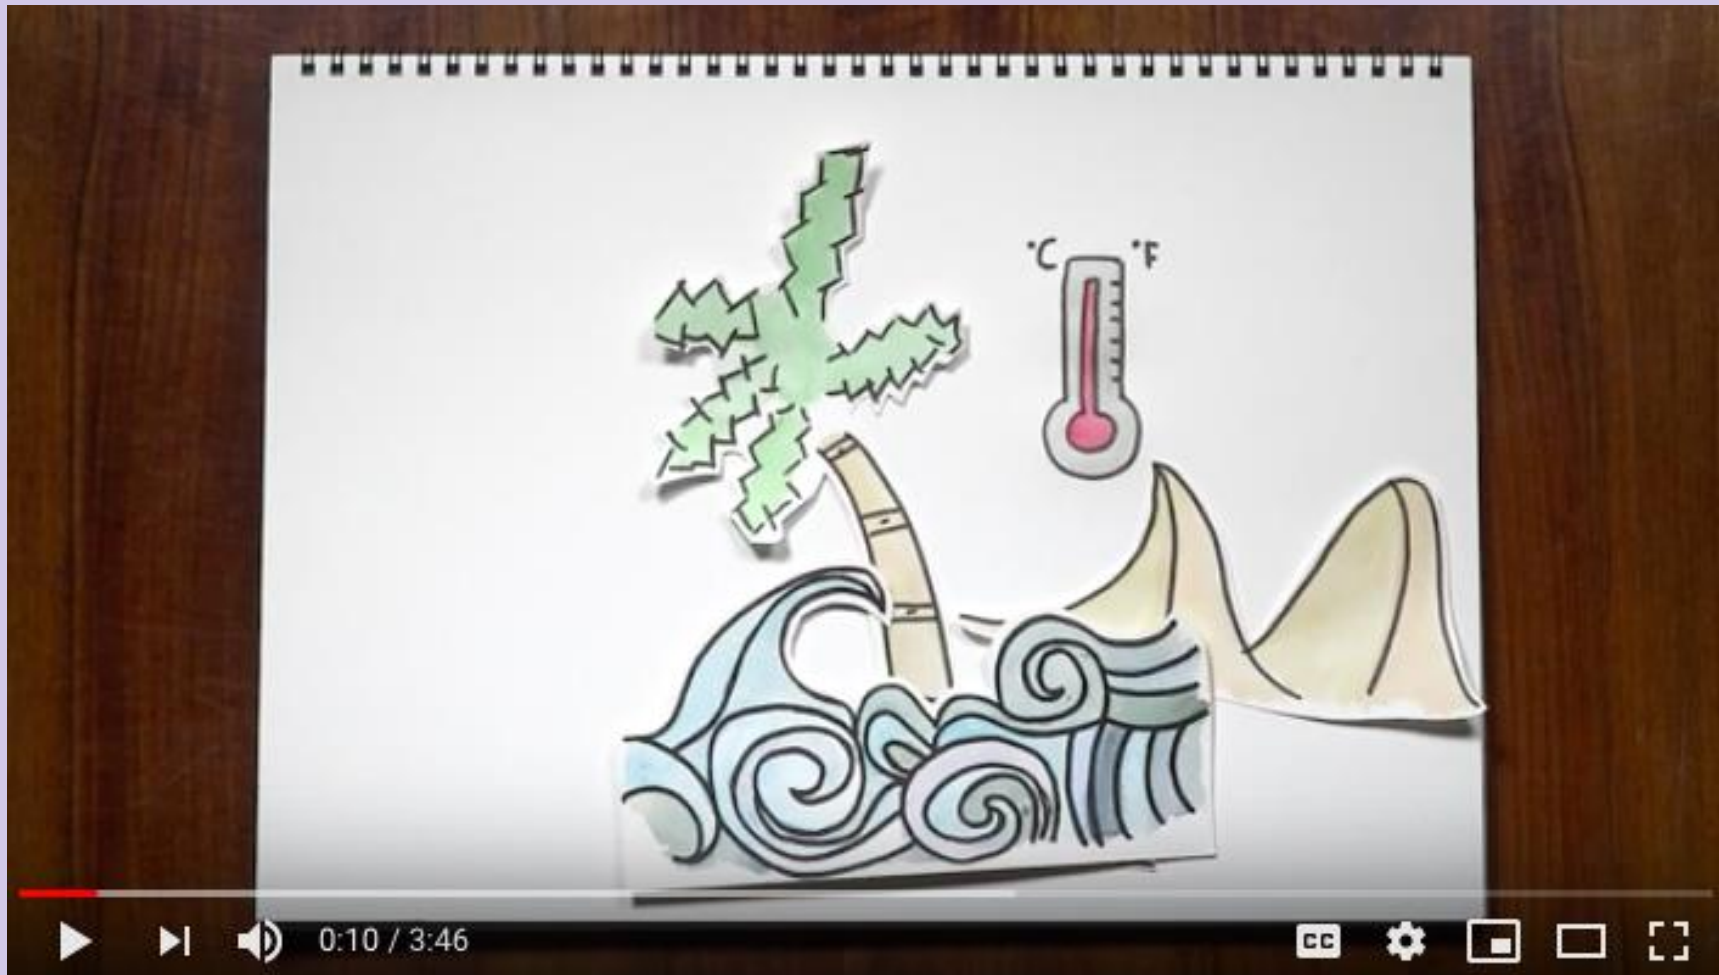

- I can identify reasons why women are particularly vulnerable to climate change.
- I can explain climate change has a greater impact on people that are most reliant on natural resources to survive, or are least able to respond to natural hazards.
- I can compare and contrast how gender expectations affect different societies.

# Task One – True or False?

Research shows women and children are 14 times more likely than men to die in a natural disaster.

In Bangladesh five times more women died than men, following the 1991 cyclone and flood.

# APPRENTICE CHALLENGE

YA WHAAAT  
M8? AHM,  
LORD SUGAR...

ALRIGHT, YOU 'ORRIBLE LOT? YOUR TASK TODAY IS  
THIS:

PLAN A GENDER RESPONSIVE CLIMATE PROJECT. AND  
MAKE IT GOOD.

# TASK: Plan a gender responsive climate project

That's a local project to help protect women from the effects of climate change to you, Claude. And men of course. But especially women, since they're worst off.

## WOT I EXPECT IN THE NEXT TWENNEE MINUTES

In groups of no more than four, plan your project on A3 paper. Make sure you've covered the basics, using words/pics/diagrams:

- WHERE will it be?
- WHAT problem(s) will it deal with?
- HOW will it deal with them?
- WHY will it work?

- **DON'T let me down. #NOPRESSURE #GETAMOVEON.**

But first, some market research... where in the world are women most affected by climate change?

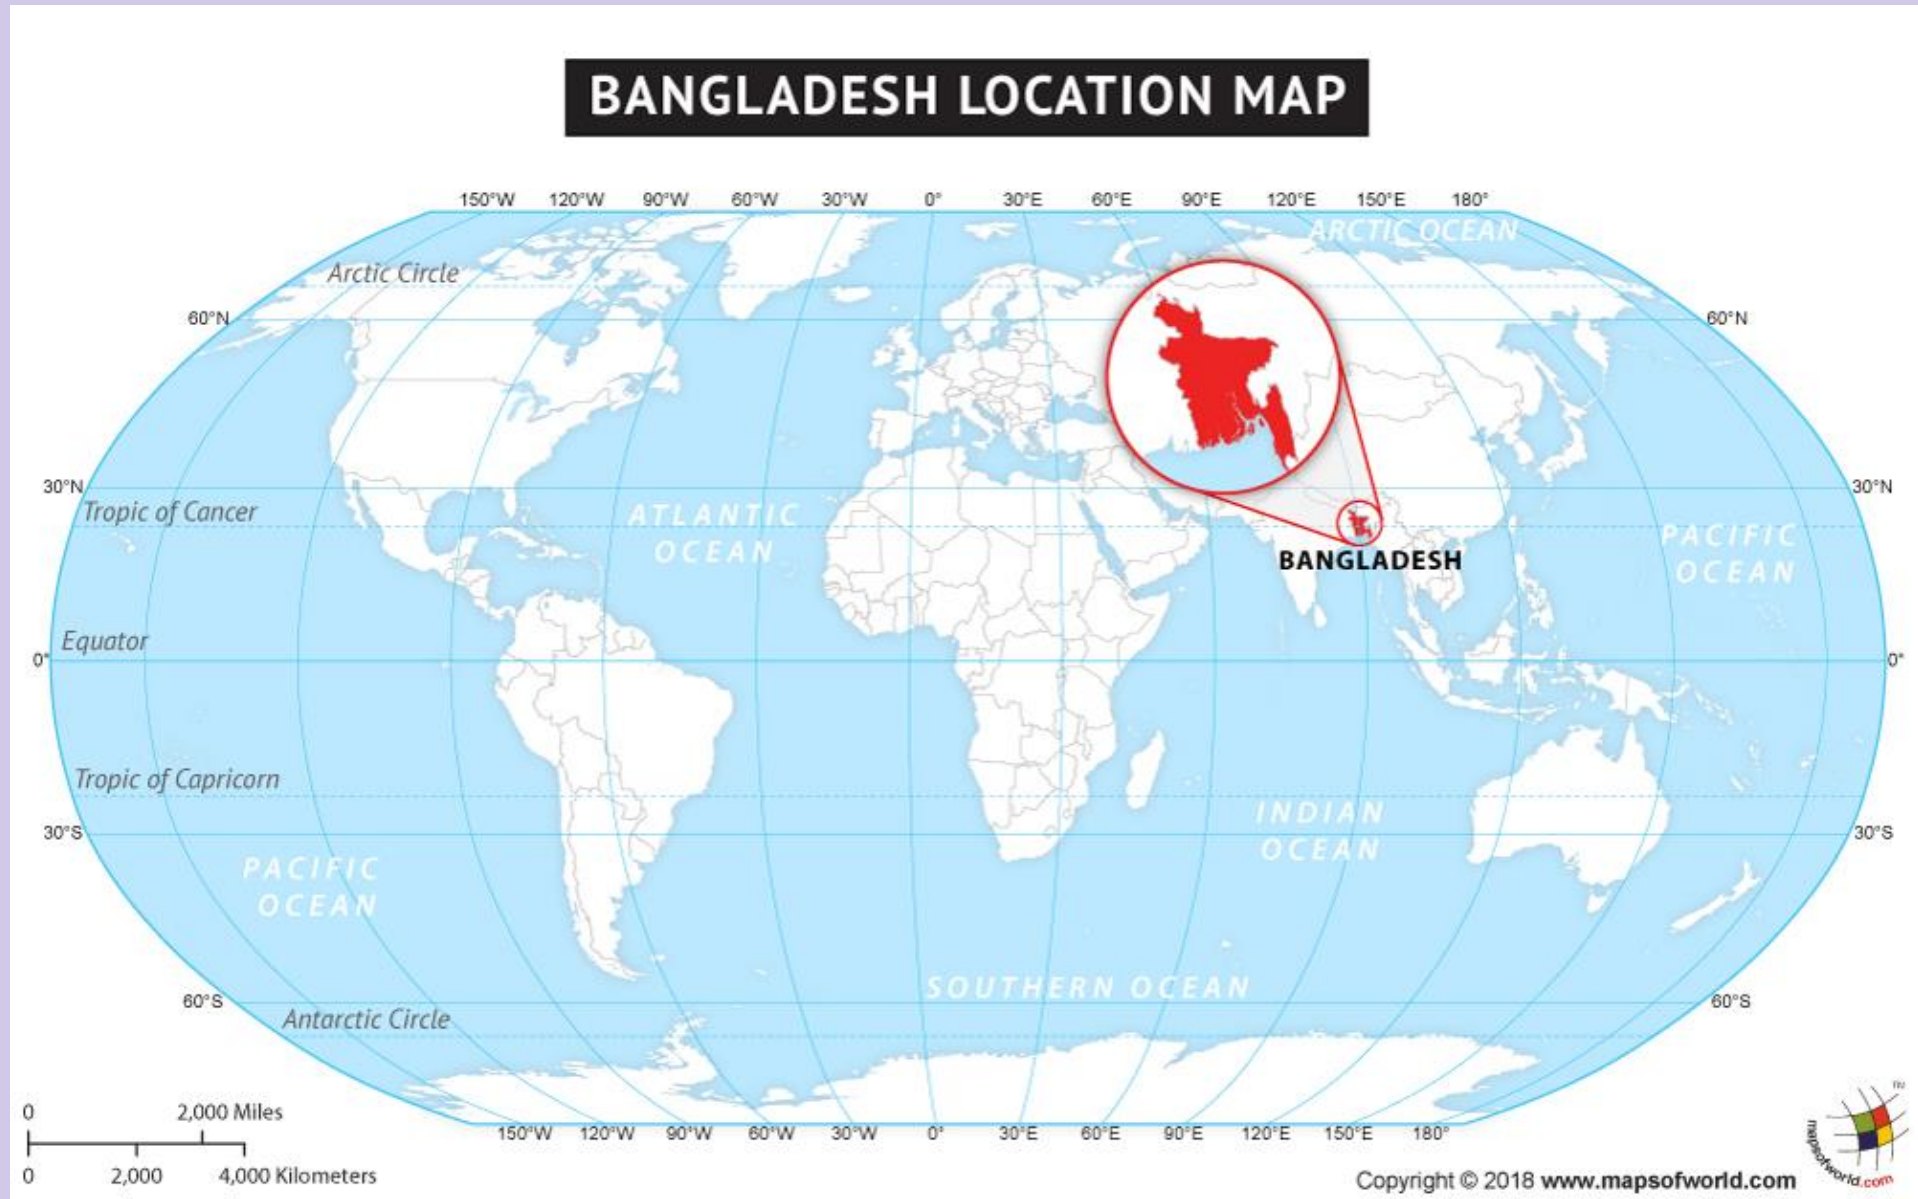

It's the  
Asia/Pacific  
region.

Why might this  
be?

# Bangladesh is prone to natural disaster. Why?

# TASK: Plan a gender responsive climate project

That's a local project to help protect women from the effects of climate change to you, Claude. And men of course. But especially women, since they're worst off.

## WOT I EXPECT IN THE NEXT TWENNEE MINUTES

In groups of no more than four, plan your project on A3 paper. Make sure you've covered the basics, using words/pics/diagrams:

- WHERE will it be?
- WHAT problem(s) will it deal with?
- HOW will it deal with them?
- WHY will it work?

- **DON'T let me down. #NOPRESSURE #GETAMOVEON.**

# Plenary

- How are people affected differently by climate change?
- What can we do to help the situation?
- How are gender expectations different around the world?
- Why is it important to challenge them?
